

## PROJECT HIGHLIGHT:

# Innovations in Nutrition + Wellness | Carrollton, TX

*Structural and Cleanroom Reconstruction in an Active Manufacturing Facility*

When a lightning strike ignited a manufacturing plant, threatening production and FDA compliance, Compass delivered both immediate emergency response and complete restoration - on time and on budget, at \$8.1M.

Through innovative temporary solutions including FDA-compliant clean rooms and equipment relocation, we kept the factory running - significantly reducing BI - throughout the entire 8-month rebuild; proving that precision and partnership can turn catastrophe into continuity.

 "Our priority from day one was keeping INW operational. Instead of a full shutdown, we engineered a containment and access solution that allowed INW to continue limited operations during reconstruction. We built a controlled access tunnel, relocated and sanitized equipment and got one compounding line running while we rebuilt the facility. This significantly reduced their business interruption."

**CHRIS WINDER**  
CRO + Managing Member

- Lightning strike caused significant fire & smoke damage to manufacturing plant
- Compass handled consulting, emergency repairs & full restoration
- Relocated equipment and built FDA-compliant temporary tunnels & clean rooms to maintain operations
- Maintained full factory capacity throughout the repair project
